

## Wall Paper Facts

We have always kept an unusually fine stock of Wall Paper. The line is larger and better than ever this year. No one can buy any cheaper than we do, no one can sell any cheaper, and few care to sell as cheap.

## Buy at Home

If you send away for paper without seeing our designs and getting prices, the chances are that you will regret it. You are sure of highest quality here and sure of closest price—and if there is ever anything the matter we are here to make good.

## People's Drug Store

Chas. Reynolds, Prop., Plymouth, Ind.

Mrs. Theodore Habercorn of Fort Wayne is here spending a few days with her mother, Mrs. John Hoham. Mrs. Habercorn will go from here to California, where she will make her future home.

**Dubious Work.**  
More than thirty years ago, when Colonel Frobel of Atlanta was called on to gauge the water in a neighboring stream, he one day had an amusing encounter with an old farmer who came along on a wood cart, drawn by an ox.

When he reached the colonel, he stopped the cart, and inquired, peremptorily: "What on 'arth are them men doin' thar?"

"They are trying to find out how many bucketfuls of water run down this creek in 24 hours," said the colonel.

"Mister, are that a true fact?" asked the farmer.

"Yes, that's just what it is," said the colonel.

"Well, mister," said the old man, in a tone of much disapproval and anxiety, "it might be all right, but it do appear to me such doin's are an-constitudoinal." — Youth's Companion.

### WHERE GOLD ACCUMULATES

Russia Passes All Other Countries in Hoarding Up the Precious Metal.

In ten years Russia has added \$310,000,000 to its stock of gold, raising the total in the treasury to \$704,000,000. Even France has been passed in the contest of accumulation; in ten years the Bank of France has increased its supply of the metal by \$229,000,000, raising the total to \$678,000,000. One year ago Russia held less than France, but in the interval the former has gained \$56,000,000, while the latter has lost \$63,000,000. It may be learned with some surprise that Italy ranks third as an accumulator of gold since 1900, its stock having risen from \$77,000,000 to \$194,000,000, a gain of \$117,000,000. Germany has gained only a little over \$5,000,000, while the Bank of England's increase has averaged only \$3,000,000 per annum, or less than \$33,000,000 in all. Its gold supply today stands just under \$200,000,000, which is exceeded not only by Russia and France, but by Austria-Hungary, and is only \$5,000,000 above Germany's, and \$7,000,000 above Italy's stock, while, of course, it is little more than half the amount held by the New York clearing house banks alone, to say nothing of the billion odd dollars that is retained in the United States treasury. Twenty years ago France held only \$263,000,000, Germany \$138,000,000, England \$113,000,000 and Austria-Hungary the insignificant total of \$22,000,000, against \$227,000,000 today. At home, the New York clearing house banks and the treasury department have added \$782,841,275 to their holdings in ten years.

### HOW TO WIN POPULARITY

Surest Method is to Be Interested in The People One Meets.

One of the surest methods of winning popularity is to be interested in the people one meets. Not a lip interest merely, but a deep, actual interest that takes one out of one's self and one's narrow circle and for the moment places one in the midst of another's sorrow or joy and lets one see life from her standpoint.

A girl who can listen sympathetically and with the real interest to the details of another girl's wardrobe and the list of her admirers has the germ of universal popularity already developed.

It may seem a trivial and tiresome matter and she may feel conscious all the time that she has far more interesting things to tell, but whether or not she realizes it, she is laying the foundation stone of friendship. Hearts, after all, are very much alike, and each one has the craving for sympathy securely planted in its depth.

But nothing irritates one more and turns one from another's personality so quickly as the simulated and insincere interest which, eventually, is always detected. The girl who says with deep emotion and with the soft pedal stop of apparent sympathy turned on, "My dear, how dreadful!" to the confidences of a sickening heart, and then hastens to break in with some frivolous fact about her self or her social engagements, is not apt to win much affection, and certainly not any lasting love.

### Meerschaum Getting Scarce.

The valuable material from which meerschaum pipes are made is continually getting scarcer and the large industry which has flourished in Vienna, Budapest, Nuremberg, Paris and in the Thuringian town of Ruhla seems endangered. The manufacture of meerschaum pipes is much more important than is generally supposed. The town of Ruhla alone has been exporting in round figures pipes to the value of about \$1,500,000 annually. The finest grade of meerschaum is found near Eskischelger, in Anatolia, Asia Minor, in a hollow, which in early days was a lake, in which the meerschaum was precipitated. Meerschaum is also found in other places, including Thebes, Egypt, the Bosnian Mountains in the neighborhood of Grubischitz, and Nuendorf in Moravia and in some sections of Spain and Portugal.

### She Learned Something.

One thing about the professor's lecture at the village hall, on "The Wonders of the Human Body," seemed to Mrs. Goppinger to be not quite clear, and after her return home she was still pondering upon it.

"I understood everything he told us about the nerves and the way they act, and all that," she said, "and how we couldn't get along without them, but I just could not understand why he called that part of the brain where the nerves all center the Sarah Bellamy. Was Sarah Bellamy the name of the woman doctor or surgeon who discovered it? I can't seem to find anything about her in the dictionary." — Youth's Companion.

### Broke 62,458 Bottles.

On the morning of April 18, 1906, the cellar of Paul Masson, a wine merchant of San Jose, Cal., contained a stock of 125,000 bottles, all neatly arranged.

Then came the earthquake, and when the proprietor was able to enter his cellar again he found that 62,458 bottles, by actual count, were broken and the remainder thrown about in the wildest confusion. It is curious, with such a large number of bottles, that the quake should have come within a few dozen of demolishing an exact half of the stock. — Wide World Magazine.

### The Shapely Back.

It is only within comparatively recent years, says the London Daily Sketch, that women have come to realize the importance of the back view. Bernhardt insisted on having the backs of her gowns trimmed and it was counted an eccentricity. Many women are charming simply because of the lines of their backs. They are good, while others get no credit for pretty faces because their backs are poorly shaped. One reason for dressing the back well is that people gaze at backs more than at faces. It is not permissible to do the latter, while nobody can object to the former.

# F. W. Bosworth Co.

Special Bargains Offered This Week

A Special Suit Sale  
**\$10 Choice \$10**

## Vanderbilt Winner After Big Prizes

### "FLYING DUTCHMAN" READY

Joe Jagersburger to Pilot Fast Race Autos in Indianapolis.

Joseph Jagersburger, "The Flying Dutchman," is the third Case racing team driver to be entered in the 500-mile International Sweepstakes race for a purse of \$25,000 over the Indianapolis Motor Speedway, Memorial Day, May 30, and the ninth entrant for that event. Jagersburger has been a strong contender in many of the big speed events of the country and has shown himself a fearless driver behind the wheel. He is a team mate of Louis Larsen and Lewis Strang, the latter being captain and manager of the team.

Jagersburger is a native of Vienna, Austria. He first came to America in 1902, when he left C. L. Charley, with whom he had been demonstrating the Mercedes car in Paris for two years preceding. Leaving Paris, he came to America with Mr. Harry Harkness, the New York multi-millionaire sportsman.

During the year 1903 Jagersburger handled the racing machines of Mr. Harkness. His most notable performance was at Elkwood Park on the 4th of July, 1903, when he made the American 100-mile track record. This performance was so good that it withstood the attacks of all other record-breaking drivers for a period of three years.

George Robertson, the famous American driver and afterwards, winner of the Vanderbilt Cup race, rode with Jagersburger in this race as his mechanic. This was smiling George Robertson's baptism in the auto racing game.

### Safe Medicine for Children

Foley's Honey and Tar Compound is a safe and effective medicine for children as it does not contain opiates or harmful drugs. The genuine Foley's Honey and Tar Compound is in a yellow package.

### Birds Killed in Migration.

According to advices from the Caucasus millions of singing birds which every winter used to find a warm retreat on the southern slopes of the forest clad mountains of the Caucasus have suddenly been surprised by the intense cold and severe snowstorms while they were on their way from the north.

The slides of the mighty mountains, the highest in Europe, and the shores of the Black sea are now strewn with small corpses of singing birds, especially bullfinches, goldfinches, robin redbreasts, fly-catchers and other birds which in the summer mostly visit these shores.

### How Birds Keep Warm.

The high temperature of birds enables them to resist cold more effectively than they could otherwise do. Whereas blood heat in man is 98.4 degrees Fahrenheit it is 107 degrees in the domestic fowl and more in some other birds.

Nevertheless they feel the cold cruelly, as you may see any frosty night if you visit an ivy creeper clad wall with a lantern; the sparrows nestle together in a closely packed mass, and if there be a chimney you may be sure the birds will have chosen its exterior as their roosting place for the sake of such warmth as it may give.

### Stealing a Comet.

A European astronomer has tried with some success to steal a comet. Some weeks ago a new comet was announced and received the name of the comet Cerulli, after its finder.

Soon, however, other astronomers were unkind enough to point out that he had appropriated what belongs to another, and that this was without doubt Fay's comet, discovered in 1843.

Its period is a little less than 7 1/2 years, and it made its reappearance on time up to 1895.

It should have come back in 1903, but failed to show up. But they are sure that the comet Cerulli is Fay's comet, repenting of its remissness seven years ago, and now resuming its regular beat.

### For Pantry Shelves.

The shelves in the pantry often mean a great deal of scrubbing. This need not be so if the shelves are covered with white oilcloth, such as is used for tables. Cut the oilcloth in long strips about three inches wider than the shelves. Make flour paste, and with it stick the oilcloth on the shelves, covering the front edge and pasting it underneath, and letting the oilcloth come up about an inch against the wall at the back. Shelves covered with oilcloth will keep dry for years, and only need wiping over with a cloth and warm water to clean them.

Republican office for the best sale bills.

## GOLD MEDAL FLOUR
